ProgAID was set-up in the wake of the terrible earthquake and Tsunami disaster that tragically struck on the 26th December 2004. The sheer destruction and loss of human life was of a scale that shook the world. F2 Music considered what the Progressive Rock community could do, even in a small way, to help alleviate some of the suffering endured, and help towards the rebuilding of lives and communities. We decided to co-ordinate the recording of a CD single to help raise as much money as possible for those that need it. The song, titled 'All Around The World', was recorded on the 29th and 30th January 2005, and featured an overwhelming number of great musicians who all agreed to give their time to appear on the single.
